

# hmcare

We bring innovative  
cleaning and hygiene  
products & services  
to the market.

# Our Vision

HFM Care aims to elevate the cleaning standard across the board in stores nationwide. We are committed to this goal by innovating both the cleaning systems/processes and the cleaning services stores receive.

## Sustainable Innovation by...

# SANZONATE™

**Sanzonate** is a chemical free cleaning system that eliminates both the need for stores to use harsh chemicals and reduces the need of single use plastics.

## AQUEOUS OZONE ON DEMAND

Sustainable Technology with the power to **eliminate chemical usage**, while increasing efficacy and cost savings.

Sanzonate is a product that utilises aqueous ozone. This is generated by the water supply feeding into the machine and the electricity passing through a nano bubble reactor.

***This converts O<sub>2</sub> (Oxygen) into O<sub>3</sub> (Ozone Gas).***

This is then infused into the water within the unit combining to the water to create aqueous ozone.

**The key part of Sanzonate is that not only will it clean stores chemically free but it is also sanitises and it is completely food safe.**

Contact us today for more information on this unique and innovative product line.

# storecare

by hfmcare

**StoreCare is our chemical free, deep cleaning service that we can offer to stores. With StoreCare we carry out a complete deep clean of all general floor areas, the deli area, windows, signage and stockroom.**

We carry out these deep cleans by practising what we preach and only utilise the use of Sanzonate. Sanzonate will work itself into the flooring to agitate and strip back, in some instances, years of historical chemical build up.

***The reason we stress this point is that this will bring back the non-slip factor to the floor making it a safer work environment and shopping experience.***

## Before and Afters...

“ We are going to be availing of the StoreCare services again in future. We’re actually signing up to their twice yearly deep cleaning contract.

**EUROSPAR** 

“ We thought the guys from HFM Care on the day were more than accommodating. A big plus for us was that they were able to work during the store’s busy trading hours.

**MACE**

“ We’d recommend the deep cleaning service to other retailers. We definitely felt like the guys listened to our feedback and worked with us to achieve the standard we desired.

With **VentCare** we aim to provide the best service possible in cleaning your kitchen vents.

According to the UK government statistics last year, grease fires in kitchens account for half of all fires.

Research conducted in the United Kingdom indicates that as many as 70 percent of all commercial kitchen fires originate in the ventilation systems of these establishments.

“ **Partnering with award winning Technology!** ”

## Introducing **Pro-Vent** by... **Probionate**™

**Pro-Vent** by Probionate uses advanced biotechnology and a unique dispersal methodology to keep kitchen extraction systems free from grease.

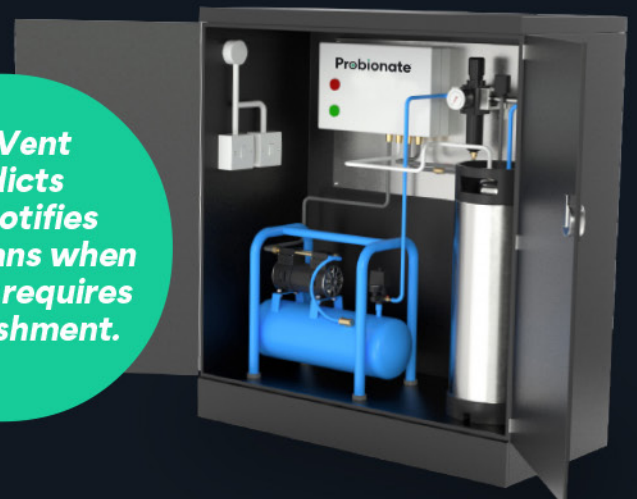

Pro-Vent gold award winning patented fogging technology disperses a bespoke blend of friendly bacteria & enzymes. This fog reaches anywhere grease can and leaves behind a protective layer that breaks down existing grease and prevents future grease from sticking.

**VentCare cleaning entails filters, canopies and the ducting. All cleaning will be completed to the TR19 standards and stores will receive certification upon completion.**

**The Pro-Vent ensures no downtime via real-time reporting and remote control features. The software calculates the correct amount of solution to be dispersed.**

**Pro-Vent predicts then notifies technicians when the fluid requires replenishment.**

**ChemiCare** is the division of our business where we supply stores with soaps, sanitiser, dishwashing liquid, dishwashing detergent and rinse aid.

Any area of the store where Sanzonate will not replace conventional cleaning methods we have a solution for stores to also buy these from HFM Care.

***A bi-product of these items is going to be single use plastic. We have already implemented a plan for this - that plan is teaming up with Ecologi.***

***With Ecologi, a percentage of the amount of chemical spend by a store will be used to fund our HFM Care Forest.***

## Sustainability Initiative...

***Ecologi to date has planted over 60 million trees for 19,000 businesses in just 3 years. Let us help you get started on your own climate goals.***

Based on a particular store spend on chemicals we will make this visible in our HFM Care Forest.

There will be visuals where we can say “X” amount of trees are “funded by”.

***We will send out updates to the store to notify them as well as keeping people informed on our websites and social media accounts.***

**KitchenCare** is our cleaning services of hot & cold counters.

We will clean these counters and remove all thick composites of grease raising the level of hygiene and prolonging the life of the counter.

***We will also clean the walls closest to the extraction system to ensure no residual grease from cooking is left.***

The wheels on movable units in the kitchen itself will also be cleaned ensuring a complete deep clean of the area.

***With KitchenCare we will elevate both the appearance and hygiene standard of your kitchen.***

## Cafe's, restaurants & retail spaces are a visual experience...

A customer's attention to detail differs from a busy staff members, who's focus is on them.

This subconscious awareness is used in the customers decision making.

So what better way to effect that process than to have a head start...
